Life-size wall template

Sheet 8 × 10 in · 2 parts

How to try it on your wall:

1. Print at actual size (100%, not “fit to page”).
2. Check with a ruler: the control line below measures exactly 4 inches.
3. Trim the white margin along the dashed lines.
4. Lay the pieces out by their numbers and tape them together.
5. Tape it to the wall with painter’s tape – turn it sideways for a landscape work.

The template shows the whole sheet including its white border. Framed, the frame adds about 3/4 inch.

Control line 4 in
